

Krystol Mortar Admixture (KMA)TM

DESCRIPTION

Krystol Mortar Admixture (KMA)TM is a specially designed chemical admixture for cementitious mortar. KMATM contains a unique blend of specialty chemicals that react with the cementitious materials in the mortar to form hydration crystals. These long, hair-like crystals block the capillary pores and micro-cracks within the mortar so that permeability of the mortar is dramatically reduced.

FEATURES

- Prevents water penetration of the mortar
- Easy to use – simply added to the mix
- Low installed cost
- Improves adhesion
- Reduces cracking
- Will self-seal new hairline cracks

USES

- Use to damp-proof mortar rendering on brick, block and other masonry walls
- Use to reduce permeability of plaster, stucco, and thin topping mixes
- Use to waterproof shotcrete and concrete overlayers

APPLICATION

KMATM is a dry powder that is added directly to the mortar during mixing. The dosage rate is 1 kg per 50 kg of cement (see Dosage). Mix to desired consistency. Most mixes will require less water than usual. Mix for at least 5 minutes after adding to the mixer.

Install mortar as normal. For increased damp-proofing performance apply mortar to a greater thickness. Continue occasional mixing as the material is being installed. Discard any material that shows signs of stiffening or setting. Do not wet-up by adding water.

CURING

Protect from rain until hardened. Protect from hot sun or wind for at least 24 hours. Cure the mortar application by misting with water repeatedly for 2 or more days.

DOSAGE

Dosage is 2% of cementitious content. (cement+any supplementary cementing materials x 0.02)

1kg per 50kg of cement.

SAFETY

This material is a dry powder that becomes caustic when mixed with water or perspiration. Avoid contact with skin or eyes. In case of skin contact, wash with soap and water. Flush eyes immediately with warm water for several minutes. If ingested, do not induce vomiting. If victim is alert, give two glasses of water. Avoid breathing dust. Wear long sleeves, eye goggles and a dust mask.

PACKAGING

5 kg, 10 kg, 25 kg plastic pails
